DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- providing predetermined keywords and predetermined categories such that the keywords and categories are correlated to each other (col. 5, lines 40-54, col. 15, lines 1-36, and col. 16, lines 25-37);
- identifying a category that corresponds to a keyword if the message exchanged within the virtual space contains the keyword (col. 15, lines 1-36, and col. 16, lines 25-37); and

- a user table that stores users, predetermined keywords sent by the user, and the categories, such that the users, keywords, and categories are correlated to one another (col. 4, lines 57-67, col. 5, lines 1-5, Figures 4A-4B, 5A-5C, col. 15, lines 1-36, and col. 16, lines 25-37); and
- administration means for obtaining from the conversation system a message to be sent to the conversation space, determining based on said category table a category that corresponds to the keyword if the message contains a keyword, and writing in said user table the keyword sender, the keyword, and the determined category (col. 4, lines 57-67, col. 5, lines 1-5, Figures 4A-4B, 5A-5C, col. 15, lines 1-36, and col. 16, lines 25-37).

As per claim 3, DeSimone discloses the profile creation system as set forth in claim 2,

- said administration means further obtains from the conversation system the time at which the message containing the keyword was sent (col. 5, lines 40-54, col. 15, lines 1-36, and col. 16, lines 25-37); and

Art Unit: 2157

- said administration means writing in said user table the time of the message and the valid period of the message, in addition to the keyword sender, the keyword and the category, and deleting an entry whose valid period since the time of message has expired (col. 5, lines 40-54, col. 15, lines 1-36, and col. 16, lines 25-37).

As per claim 4, DeSimone discloses the profile creation system as set forth in claim 2,

- wherein said user table stores the users, the keywords, the categories and message senders whose messages are related to the keywords (col. 4, lines 57-67, col. 5, lines 1-5, Figures 4A-4B, 5A-5C, col. 15, lines 1-36, and col. 16, lines 25-37); and
- said administration means creates a conversation log in the conversation space, obtains from the conversation log and the conversation system the senders of messages that were sent before and/or after the message containing the keyword was sent, and writes in said user table the senders as related users, such that the related users are correlated with the keywords (col. 4, lines 57-67, col. 5, lines 1-5, Figures 4A-4B, 5A-5C, col. 15, lines 1-36, and col. 16, lines 25-37).

As per claim 5, DeSimone discloses the profile creation system as set forth in claim 2,

- wherein said user table stores the users, the keywords, the categories and rating data that indicates harmfulness for each user (col. 4, lines 43-56); and
- said administration means updates the rating data of a user when a predetermined harmful keyword is sent (col. 4, lines 43-56).

As per claim 6, DeSimone discloses the profile creation system as set forth in claim 2,

Art Unit: 2157

- wherein the conversation system processes messages exchanged by the conversation devices based on users' categories stored in said user table (col. 5, lines 40-54, col. 15, lines 1-36, and col. 16, lines 25-37).

As per claim 7, DeSimone discloses a computer-readable recording media having a profile creation program for use in a conversation system having a plurality of terminal devices that can exchange messages among each other, the plurality of terminal devices being connected to a network and sharing one of a plurality of virtual conversation spaces formed on the network, said profile creation program executing steps of:

A: storing predetermined keywords and predetermined categories such that the keywords and categories are correlated to each other (col. 5, lines 40-54, col. 15, lines 1-36, and col. 16, lines 25-37);

B: obtaining from the conversation system a message to be sent to the conversation space (col. 5, lines 40-54, col. 15, lines 1-36, and col. 16, lines 25-37);

C: determining based on the category table a category that corresponds to the keyword if the message contains a keyword (col. 15, lines 1-36, and col. 16, lines 25-37); and

D: storing the sender of the keyword, the keyword, and the determined category, such that the sender, keyword, and category are correlated to one another (col. 15, lines 1-36, and col. 16, lines 25-37).

As per claim 8, DeSimone discloses a profile creation method for use in a conversation system having a plurality of terminal devices that can exchange messages among each other, the plurality of terminal devices being connected to a network and sharing one of a plurality of virtual conversation spaces formed on the network, said method utilizing a category table that

Art Unit: 2157

can be referred to via the network, predetermined keywords and predetermined categories being correlated to each other in the category table, said method comprising steps of:
